"Education":
        INATEL: // Instituto Nacional de Telecomunicações – Minas Gerais / Brazil
                Bachelor in **Computer Engineering**; // Dec 2012

"Work experience": // Latest emails
        eduardo.magaldi@tilda.de: // AllAboutMe (Tilda) - Mental Health - closed
                Senior Full-stack Developer; // 8 months - Aug 2021 / Mar 2022 - Berlin, Germany
                        // Tilda is an web app for women 45 or older who have light depression or light
                        // mental health issues, learning through content and having weekly online
                        // group therapy sessions. Built using React, Node.js, Terraform and Hasura
                        // (GraphQL).

        emqpaula@wunder.tax: // Wundertax - Tax Declarations - wundertax.de
                Senior Front-end Developer; // 1 year - Sep 2020 / Jul 2021 - Berlin, Germany
                        // Wundertax is an webapp for tax declarations in Germany, offering easy to
                        // understand instructions, even in English, and sending the final
                        // declaration to the tax office electronically. Main technologies are React,
                        // Hugo (Golang), Ruby and Java.

        eduardomagaldi@llac.adv.br: // Locatelli Advogados - Tax Law Office - www.llac.adv.br
                Senior Full-stack Developer; // Jul 2020 / Present - Freelancer
                        // Built a trial administrative system from scratch using Vue.js, Node.js and
                        // PostgreSQL database with GraphQL, on AWS, saving many working hours from
                        // employees by emailing lawsuit state reports to clients automatically.

        em@talentrocket.de: // TalentRocket - Legal Recruitment - www.talentrocket.de
                Senior Front-end Developer; // 2.5 years - Mar 2018 / Jun 2020 - Munich, Germany
                        // TalentRocket is a recruiting website specialized for lawyers in Germany. Using
                        // Angular 8 and Drupal as a backend, companies can offer jobs and have profile
                        // pages to get in touch with lawyers and hire them.

        eduardo.queiroz@btgpactual.com: // BTG Pactual - Investment Bank - www.btgpactual.com
                // Via www.brq.com
                Senior Front-end Systems Analyst; // 4 months - Nov 2017 / Feb 2018 - São Paulo, Brazil
                        // Single front-end developer of the algotrading contest system
                        // Stratsphera, using BTG Pactual Digital patterns: Angular.js, Gulp, Node-sass
                        // and require.js. In Stratsphera, developers can code their investment
                        // strategies in Python directly on the website, select settings, and run their
                        // code, checking graphs of performance afterwards. The winners of contests
                        // get high prizes in cash.

        eduardo.magaldi@miraeducacao.com.br: // Mira Educação - Teaching Technology - www.mira.vc
                Senior Front-end Programmer; // 1 year - Jun 2016 / Nov 2017 - São Paulo, Brazil
                        // First front-end developer of the Mira Portal, using Angular.js, Stylus,

```
                // Bootstrap and Npm Scripts. The Mira Portal exchanges with its back-end in
                // Java Spring, allowing teachers to plan lessons that will be automatically
                // downloaded to tablets during classes.

        eduardo.magaldi@fbiz.com.br: // F.biz - a WPP company – Advertising Agency – www.fbiz.com.br
                Technology Coordinator; // 1 year - Aug 2015 / Jun 2016 - São Paulo, Brazil
                        // I have coordinated third-party developers in Unilever's team. F.biz was one of
                        // Unilever's two worldwide production partners, applying layout designs in its
                        // CMS platform to most websites of the brand's products, as Sunsilk, Hellmann's,
                        // Cif, Vim, Surf, Lipton, and so on. I acted as point of contact between
                        // programmers, international back-end partner, local creative agencies and
                        // project team, operating as consultant of layout application viability on the
                        // platform.
                Front-end Programmer Analyst; // 1 year - Jun 2014 / Aug 2015 - São Paulo, Brazil
                        // Front-end programmers at F.biz work initially in a guideline, similar to
                        // Twitter's Bootstrap's documentation. Each HTML/CSS/JS module is built
                        // separately, using Sass, and then integrated in a single page. A great part of
                        // the front-end of the sports e-commerce Netshoes was developed by the agency. I
                        // have also worked with large brands as Unilever, Subaru, Zattini, Toddynho,
                        // Multiplus, Claro, NET and Instituto Maria da Penha.

        emagaldi@verios.com.br: // Vérios Investimentos - Fintech - www.comparacaodefundos.com
                Full-stack Developer; // 2.5 years - Feb 2012 / Jun 2014 - São Paulo, Brazil
                        // Built using very recent technologies at the time, as Twitter Bootstrap,
                        // Backbone.js, Node.js and Redis as a database, and focusing on performance,
                        // comparacaodefundos.com is the pioneer webapp for investment funds search in
                        // Brazil. Its architecture based on thick client makes it much faster than any
                        // (generally obsolete) national financial software. The webapp was famous in its
                        // market and very complimented by its performance. I still hold stocks of the
                        // firm.

        eduardo@b2ml.com.br: // B2ml Sistemas - Software Development - www.b2ml.com.br
                Trainee (Designer and Developer); // 2 years - Feb 2010 / Dec 2011 - Itajubá, Brazil
                        // B2ml is the largest company inside the incubator of Federal University of
                        // Itajubá, State of Minas Gerais, Brazil. The startup offers websites based on
                        // their own CMS, using Java and pixel perfect design, and also develops awarded
                        // software, one of them acquired by Peixe Urbano. Besides learning HTML,
                        // Javascript and CSS, I also obtained important design concepts developing
                        // layouts.

"Goals":
        Improve programming and language skills;
        Be in touch with the latest trends in web development;

"Skills":
        const markup = HTML && CSS; // Less, Sass and Stylus
        const programmingLanguages = JavaScript; // Vanilla, ES6, TypeScript, Node.js and jQuery
        const frameWorks = React || Vuejs || (Angular && Protractor) || Angularjs || Backbonejs;
        const moduleLoaders = RequireJS; // r.js
        const buildTools = grunt || gulp || webpack;
        const packageManagers = npm || bower;

        const databases = PostgreSQL || Redis;
```

```javascript
